Utah Driver
Education News

June 2026

Thank you all for those who attended the annual UDTSEA Conference

Important Information:

- Professional Development Credit will be posted on your MIDIS transcripts, be sure and check your transcripts to ensure you received credit for re-licensure.
- 8 hours of PD are required by July 1st to renew your driver education endorsement.
- If you missed the conference and need PD hours you can locate alternative PD opportunities on the [UDTSEA](#) website. Or go directly to [2026 Conference videos](#).
- To obtain PD hours from alternative options you will need to watch conference videos and do assignment. Provide me with the title of video watched, summary of each video, and how you will implement it into your teaching. 1 video = 1 hour of PD, send assignment to [Audra](#).
- The new examiner training course will not be available until the middle of June. You will receive emails to renew your examiner certificates.

Zero Fatalities Banners and Posters

Safe Driving messages are available for free!

Hang these banners and poster in your gymnasium or on the fences inside your sports stadiums.

Contact [Shaunna Burbidge](#) to receive your messaging banners

SAFEST DAYS OF SUMMER

100SAFESTDAYSOFSUMMER.ORG

As we approach Memorial Day, we also enter one of the most critical periods on our nation's roadways. The stretch from Memorial Day through Labor Day has historically been marked by a sharp increase in crashes, particularly those involving teen drivers. Together, we can move beyond awareness and drive measurable impact.

We invite you to partner with us in this effort by aligning your campaigns, sharing resources, and amplifying the message across your networks. Visit www.100safestdaysofsummer.org to access materials, coordinate initiatives, and take action.

Safe Roads Driving Challenge

As a part of our team of driver educators, you know great driver education works and we are out to prove it.

With Street Smarts, we're launching the **Safe Roads Challenge – Utah**, a statewide initiative that gathers real-time driving analytics through a mobile app. We are providing it to you at no cost to download and engage with so we can gather driving analytics that Lecticon will present at the UDTSEA Conference on April 26 during their session: "**From Gut Feel to Hard Data: Proving Driver Ed Works.**"

We are looking at the opportunity to provide the Challenge to all our student information across the state and learn more about what's working and the challenge currently taking place in Florida, Washington, and Hawai'i, with the next launch

We would really appreciate your participation.

Getting Started (3 Easy Steps)

1. Download the Safe Roads Challenge app (Quick Start Guide attached)
2. Create your account (enable Location Services so trips record correctly)

Join the Utah team using code: TEAMUTAH

The app uses minimal battery and data and **does not share any personal data with third parties**. Participation is completely free!
